R. V. COLLEGE OF ENGINEERING
Autonomous Institution affiliated to VTU
IV Semester B. E. Examinations April/May-16
Common to ISE / CSE
THEORY OF COMPUTATIONS

Time: 03 Hours

Maximum Marks: 100

Instructions to candidates:

- Answer all questions from Part A. Part A questions should be answered in the first three pages of the answer book only.
- Answer FIVE full questions from Part B.

PART-A

1	1.1	For the language $L = \{ab, c\}$ over the set $A = \{a, b, c\}$, find L^3 .	01
	1.2	Given $L_1 = \{a^i b^j c^k / i, j \geq 1\}$ and $L_2 = \{a^i b^j c^k / i, j \geq 1\}$, find $L_1 \cap L_2$.	01
	1.3	If $L = \{a, bba, aaa\}$ then $L^0 =$ _____.	01
	1.4	The relation between Σ^* and Σ^+ is _____.	01
	1.5	Write the primitive regular expressions.	01
	1.6	Write the regular expression for the language: $L = \{a^{2n} b^{2m} b : n, m \geq 0\}$ over $\Sigma = \{a, b\}$.	01
	1.7	Find the regular expression for the transition graph in Fig 1.7:	
		Fig 1.7	01
	1.8	Draw the plan for showing the equivalence of four different notations for regular languages.	01
	1.9	If $G = (V, T, P, S)$ is a CFG, then any string α in $(VUT)^*$ such that $S \xRightarrow{*} \alpha$ is a _____.	01
	1.10	The transition function δ for the PDA is given by _____.	01
	1.11	_____ of a CFL and regular language is always CFL.	01
	1.12	CNF grammar has atmost _____ productions.	01
	1.13	Define instantaneous description (ID) of pushdown automata.	01
	1.14	A pushdown automaton is essentially _____ with a stack data structure.	01
	1.15	Draw the organization of constructions showing equivalence of three ways of defining the CFLs.	01
	1.16	Define deterministic pushdown automata.	01
	1.17	The languages accepted by TMs are called _____.	01
	1.18	Show the relationship between recursive RE and non-RE languages.	01
	1.19	The _____ symbol is in Γ' but not in Σ of TM.	01
	1.20	Every language accepted by a multiple TM is _____.	01

PART-B

<p>2</p> <p>a</p> <p>b</p>	<p>Design a <i>DFA</i> that accepts those words from $\Sigma = \{a, b\}$ where the number of <i>b</i>'s is divisible by three. Sketch the state table diagram of finite automaton <i>M</i>.</p> <p>Convert the given ϵ - <i>NFA</i> in fig 2b to its equivalent <i>DFA</i>. Also define the language accepted by it.</p>	<p>05</p>												
<p>c</p>	<div data-bbox="468 348 1053 505" data-label="Diagram"> </div> <p>Fig 2b</p> <p>Write the differences between <i>NFA</i> and <i>DFA</i>.</p> <p style="text-align: center;">OR</p>	<p>08</p> <p>03</p>												
<p>3</p> <p>a</p> <p>b</p> <p>c</p>	<p>Minimize the <i>DFA</i> given in fig 3a .</p> <div data-bbox="444 707 1065 883" data-label="Diagram"> </div> <p>Fig 3a</p> <p>Design an <i>NFA</i> to accept strings from $\Sigma = \{a, b\}$ ending with <i>ab</i> or <i>ba</i>.</p> <p>Construct a ϵ-<i>NFA</i> that accepts decimal numbers consisting of</p> <ol style="list-style-type: none"> an optional + or - sign; a string of digits; a decimal point; another string. 	<p>08</p> <p>04</p> <p>04</p>												
<p>4</p> <p>a</p> <p>b</p> <p>5</p> <p>a</p> <p>b</p> <p>c</p>	<p>Obtain regular expression for the following:</p> <ol style="list-style-type: none"> over $\Sigma = \{a, b\}$ and $L(r) = \{a, bb, aa, abb, ba, bbb, \dots\}$; over $\Sigma = \{0, 1\}$ and $L(r) = \{\text{all strings containing substring } 00\}$; over $\Sigma = \{0, 1\}$ and without two consecutive zeroes. <p>Consider the <i>DFA</i>:</p> <table border="1" data-bbox="658 1309 848 1446"> <tr> <td>δ</td><td>0</td><td>1</td></tr> <tr> <td>$\rightarrow q_1$</td><td>q_2</td><td>q_1</td></tr> <tr> <td></td><td>q_2</td><td>q_3</td></tr> <tr> <td></td><td>q_3</td><td>q_2</td></tr> </table> <ol style="list-style-type: none"> Give all the regular expressions $R_{ij}^{(0)}$; Obtain the regular expression by eliminating q_2. <p style="text-align: center;">OR</p> <p>State and prove pumping lemma for regular languages.</p> <p>Prove that $L = \{0^n 10^n \mid n \geq 1\}$ is not regular.</p> <p>Prove that class of regular languages is closed under union and concatenation.</p>	δ	0	1	$\rightarrow q_1$	q_2	q_1		q_2	q_3		q_3	q_2	<p>08</p> <p>08</p> <p>08</p> <p>04</p> <p>04</p>

	q_2	q_3												
	q_3	q_2												

6	a	Obtain a <i>CFG</i> to generate the following language: $L = \{W/W\epsilon(a + b)^*\}$ and all strings of even length}.	05																				
	b	Obtain the <i>LMD</i> , <i>RMD</i> and parse tree for the string <i>aabbabab</i> where the grammar <i>G</i> is given by $S \rightarrow aB/bA, A \rightarrow a/as/bAA, B \rightarrow b/bS/aBB$.	07																				
	c	Show that the language of all non-null strings of a's defined by <i>CFG</i> $G = \{\{S\}, \{a\}, \{S \rightarrow aS/Sa/a\}, S\}$ is ambiguous.	04																				
OR																							
7	a	Eliminate all ϵ –productions from the grammar: $S \rightarrow BAAB, A \rightarrow 0A2/2A0/\epsilon, B \rightarrow AB/1B/\epsilon$.	03																				
	b	Remove useless symbols and production from $G = (V, T, S, P)$, $V = \{S, A, B, C\}, T = \{a, b\}$ with productions $S \rightarrow aS/A/C, A \rightarrow a, B \rightarrow aa, C \rightarrow acb$.	03																				
	c	Remove all unit productions from: $S \rightarrow Aa/B, B \rightarrow A/bb, A \rightarrow a/bc/B$.	03																				
	d	Reduce the <i>CFG</i> <i>G</i> into Chomsky normal form given by following productions: $S \rightarrow aAc, A \rightarrow aB/bAB, B \rightarrow b, C \rightarrow c$.	07																				
8	a	Design a <i>PDA</i> to accept $L = \{WCW^R / W \in \{a, b\}^*\}$. Show the sequence of <i>IDs</i> to accept the string <i>abcba</i> .	10																				
	b	Convert the grammar $S \rightarrow aSa/bSb/\lambda$ to a <i>PDA</i> that accepts the same language by empty stack.	06																				
OR																							
9	a	Construct a <i>PDA</i> to accept balanced parenthesis and trace the <i>PDA</i> for the string $((\)(\))$.	08																				
	b	Convert the following <i>PDA</i> to Grammar: $P = \{\{q_0\}, \{b, c\}, \{z_0, z_1\}, \delta, \epsilon_0, z_0\}$.	08																				
10	a	Design a Turing machine to accept palindrome over $\{a, b\}$. Give the sequence of <i>IDs</i> for the strings " <i>abaa</i> " and " <i>aa</i> ".	10																				
	b	Prove that if <i>L</i> is recursive language, then so is complementation of <i>L</i> .	06																				
OR																							
11	a	Define Post's correspondence problem (<i>PCP</i>). Solve the following instance of <i>PCP</i> :																					
		<table><tr><td></td><td>A</td><td>B</td></tr><tr><td><i>i</i></td><td>w_i</td><td>x_i</td></tr><tr><td>1</td><td>10</td><td>101</td></tr><tr><td>2</td><td>01</td><td>100</td></tr><tr><td>3</td><td>0</td><td>10</td></tr><tr><td>4</td><td>100</td><td>0</td></tr><tr><td>5</td><td>1</td><td>010</td></tr></table>		A	B	<i>i</i>	w_i	x_i	1	10	101	2	01	100	3	0	10	4	100	0	5	1	010
	A	B																					
<i>i</i>	w_i	x_i																					
1	10	101																					
2	01	100																					
3	0	10																					
4	100	0																					
5	1	010																					
b	Write short notes on:																						
	i) Multitape Turing machine; ii) Chomsky hierarchy.		08
